## REPORT ON CNE ON BASICS OF PHARMACOLOGY

- Date of Event: 11th sept 2025
- Time: 02:00 PM To 5:00 PM
- Venue: Sakhar Kamgar Hospital Trust Seva Nursing College, Shrirampur

### Introduction

Continuing Nursing Education (CNE) on Basics of pharmacology was conducted on 11th sept 2025 at Sakhar Kamgar Hospital Trust Seva Nursing College. The event aimed to provide valuable hands-on training and knowledge to nursing students and staff on the use of emergency drugs in critical/emergency condition. The CNE organized by the Mr. Mahesh Ingole, Clinical Instructor, provided an interactive platform for learning and skill development in emergency care. Program was held from 02:00 PM To 5:00 PM, and it was attended by college staff and students.

### Subject Expert:

The event was honoured with the presence of several esteemed guests:

Sr.No.	Name Of Resource Person	Educational Qualifications	Working Institute	Contact Details	Syllabus To Be Cover
1	Mr. Suraj Gholap	M. Pharm	Wani College Of Pharmacy Ganegaon,Rahuri	7387188565	Drugs Used In Respiratory, Cardiovascular, Endocrine, Nervous System,.

Presence of lecturer added value and significance to the event, as they shared their knowledge and insights on use of emergency drugs in critical/emergency condition and training in the nursing profession.

### Participants:

Workshop was attended by:

- 3rd-semester BSc Nursing students
- 4th-semester BSc Nursing students
- Hospital staff

### Organizing team

Mr. Mahesh Ingole sir and 3rd-semester BSc Nursing students were responsible for organizing the event. They meticulously planned and coordinated all aspects of the CNE, from inviting the guest speakers to arranging the necessary materials and equipment. Their efforts ensured the event was both informative and engaging.

### Budget and expenditure

Total budget allocated for the CNE on Basics of pharmacology was ₹4,000.

### Program schedule

Continuing Nursing Education (CNE) on Basics of pharmacology was a comprehensive session that focused on use of emergency drugs in critical/emergency condition and training in the nursing profession. The program unfolded as follows:

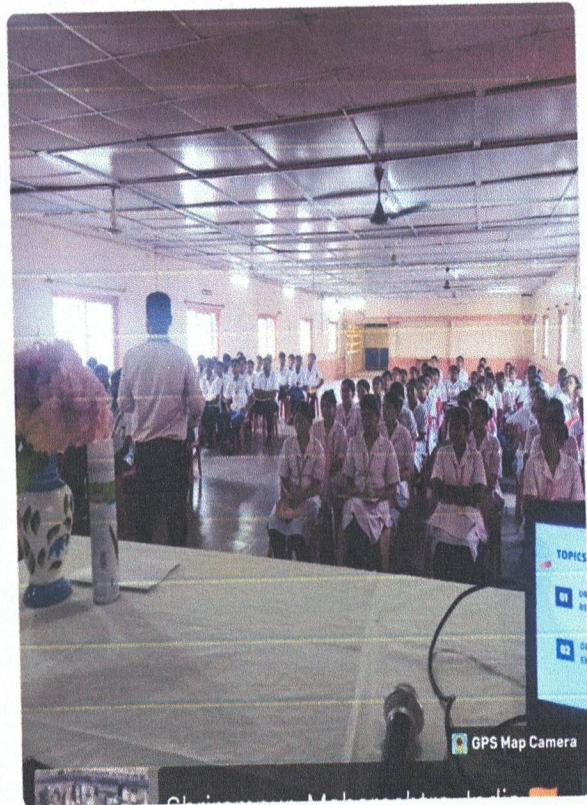

S.N.	Title of event	Time	Duration	Honoured by
1	Morning Attendance & Introduction Of Guest	02:00 to 02:10 pm	10 min.	Mr. Mahesh Ingole
2	Theory Lecture 1 :	02:10 to 03:20 pm	70 min.	Mr. Suraj Gholap
3	Short Break	03:20 to 03:30 pm	10 min.	-
4	Revision 1 <sup>st</sup> Lecture	03:30 to 03:50 pm	20 min.	Mr. Suraj Gholap
5	Theory Lecture 2 :	03:50 to 05:00 pm	70 min.	Mr. Suraj Gholap
6	End Of CNE	05.00 pm	-	-
7	Vote of thanks	05:00 to 05:15 pm	15 min	-

## SAKHAR KAMGAR HOSPITAL TRUSTS SEVA NURSING COLLEGE, SHRIRAMPUR CONTINUING NURSING EDUCATION PROGRAM ON “BASICS OF MICROBIOLOGY”

**Date of Program:** 6th and 7th November 2025

**Venue:** Multipurpose hall of third floor

**Supervisors:** Ms. Gayatri Gawade

**Time of Program:** 10:00 am to 4:00 pm

**Participants:** III Semester B.Sc. Nursing

**Expert:** Mr. Vasim Salim Shaikh

### Topics:

- Pathogenic Organisms: Morphology of Pathogenic Organisms
- Infection Control: Nosocomial Infections, Prevention of MRSA (Methicillin-resistant Staphylococcus aureus) and MDRO (Multi-Drug Resistant Organisms) in Healthcare Settings
- Microorganism Identification: Identification of Disease-Producing Microorganisms
- Types of Staining: Specific Microorganisms: DNA and RNA Viruses
- Antibiotic Management: Antibiotic Stewardship, Importance of Antibiotic Stewardship, Anti-Microbial Resistance (AMR).

### Description of Event Schedule

Two-day Continuing Nursing Education program was systematically conducted from 10:00 am to 4:00 pm on both 6 and 7th November 2025. The sessions were led by Mr. Vasim Salim Shaikh, who delivered detailed presentations covering the fundamental concepts and clinical relevance of microbiology. The schedule ensured focused learning, starting with the basics like the morphology of pathogenic organisms and types of staining, progressing to critical contemporary issues such as Nosocomial Infections, DNA and RNA Viruses, and the identification of disease-producing microorganisms. A significant portion of the program was dedicated to the crucial topics of Anti-Microbial Resistance (AMR), the principles and importance of Antibiotic Stewardship, and practical strategies for the prevention of highly resistant organisms like MRSA and MDRO in clinical settings, ensuring a thorough grounding in infection control and safe clinical practices for all participating students.

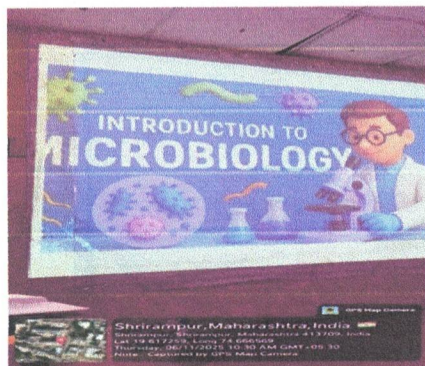

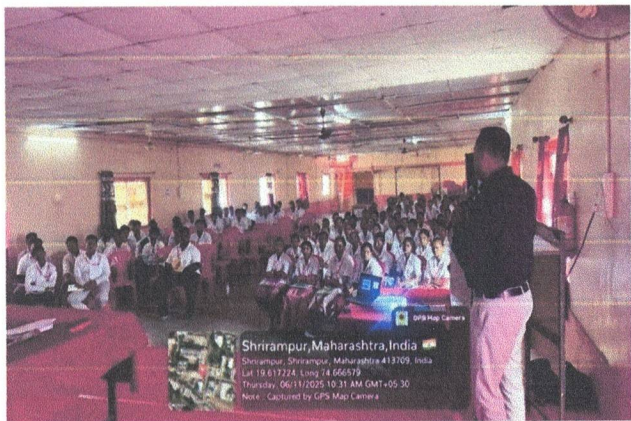

### Conclusion

- Overall Outcome: The CNE program was successfully organized and executed.
- Key Achievement: The program provided valuable insights into infection control and safe clinical practices.
- Impact on Students: It significantly enhanced students' understanding of microbiological concepts and their direct application in professional nursing care.

### REPORT OF CNE ON BLS & ACLS

Time: 10am to 4pm

Venue: MPH Hall

Participants: Hospital staff & Students

Date: 26 & 27 November

Organized By: Ms.Sonali Shinde And Mr. Sanket Bhalerao

Resource Person: Mr. Chetan Borude

Time	Topic	Details
10:15–10:30	<b>Introduction</b>	BLS, Chain of survival, Good Samaritan Act, Roles
10:30–11:15	<b>Primary Survey (ABCDE)</b>	Airway → Breathing → Circulation → Disability → Exposure
11:15–12:00	<b>Trauma Management</b>	Bleeding control, splinting, fractures, spine precautions, burns
12:00–12.30	<b>Adult BLS Assessment</b>	Scene safety, response, call for help, pulse, breathing
12:30–1.00	<b>Adult CPR Concepts</b>	30:2 ratio, depth, hand position, rescue breaths, AED basics
<b>Lunch Break</b>		
10:15–10:30	<b>Recap of Day 1</b>	Mistake correction, quick demo review
10:30–11:15	<b>Child BLS Theory</b>	Age, pulse, depth,
11:15–12:00	<b>Child BLS Practical</b>	CPR + AED practice
12:00–12.30	<b>Infant BLS Theory</b>	Pulse, depth, 2-finger/2-thumb method, breaths
12:30–1.00	<b>Infant BLS Practical</b>	CPR, ventilations, AED demo
1:00– 2.00	<b>Lunch</b>	
2:00–2:30	<b>Choking Management</b>	Adult/child thrusts; infant back blows + chest thrusts
2:30–3:30	<b>Trauma Scenarios</b>	RTA simulation, fall injury, bleeding + shock
3:30–4:00	<b>Final Examination</b>	MCQs + practical (adult/child/infant BLS, choking, ABCDE)

**Introduction:** A two-day Continuing Nursing Education (CNE) programme on Basic Life Support (BLS) was conducted on 26 and 27 November at our institute. The objective of the programme was to enhance the knowledge, skill, and confidence of students and staff in managing life-threatening emergencies. The session was conducted under the expert guidance of BLS instructor Mr. Chetan Borude, who facilitated both theoretical and practical components.

#### Objectives of the CNE

1. To improve the understanding of the BLS principles and protocols.
2. To train participants in Cardiopulmonary Resuscitation (CPR) for adults.
3. To provide hands-on practice on AED use, rescue breathing, and choking management.
4. To enable participants to respond effectively during cardiac arrest, respiratory emergencies, and sudden collapse.

#### Overview of the Sessions

##### Day 1 – Theory Session

The workshop began with an introduction to the importance of Basic Life Support and its role in saving lives. The instructor explained:

- Pre test
- Chain of Survival
- Early recognition and activation of emergency services
- Initial assessment of an unconscious victim
- Scene safety and universal precautions
- Causes of cardiac arrest and respiratory failure

**This was followed by demonstrations on:**

*Blusale*  
**Principal**

- Rescue breaths with barrier devices
- Adult CPR ratio and technique
- Recovery position

### Day 2 – Practical Skill Training of adult and pediatric CPR.

Participants were divided into small groups for hands-on practice. Instructors supervised each participant to ensure correct technique and competency. Skills taught included:

- Cardiopulmonary Resuscitation (CPR) on adult manikins
- Chest compressions and ventilation practice
- Use of Automated External Defibrillator (AED)
- Relief of foreign-body airway obstruction (choking)
- Post-resuscitation care and positioning
- Post Test
- Feedback

**Participation:** CNE witnessed enthusiastic participation from students and staff, who actively engaged in discussions, demonstrations, and practice sessions.

**Outcome of the Programme:** CNE successfully enhanced the participants' ability to:

- Recognize emergencies quickly
- Perform effective CPR
- Use an AED confidently
- Manage choking and unconsciousness
- Provide immediate, lifesaving interventions until advanced care arrives

Participants reported improved confidence and readiness to respond to real-life emergencies.

### Conclusion

Two-day Basic Life Support (BLS) CNE proved to be highly beneficial and skill-oriented. It strengthened the emergency care competencies of the participants and emphasized the importance of timely response during critical situations. The institute extends sincere gratitude to Mr. Chetan Borude for his valuable guidance and engaging teaching.

### **14.11.2025 - Day 1:**

#### **Foundations of English**

- 10:00 – 10:15 → Registration & Icebreaker
- 10:15 – 10:45 → Introduction to English Language
- 10:45 – 11:30 → English Alphabet & Pronunciation
- 11:30 – 11:45 → Break
- 11:45 – 12:30 → Basic Vocabulary (Common words & meanings)
- 12:30 – 1:00 → Simple Greetings & Introductions (Practice)

#### **Basic Grammar & Sentence Formation**

- 2:00 – 2:15 → Revision of Day 1
- 2:15 – 3:00 → Parts of Speech (Noun, Pronoun, Verb)
- 3:00 – 3:30 → Simple Tenses (Present tense)
- 3:30 – 3:45 → Break
- 3:45 – 4:30 → Making Simple Sentences
- 4:30 – 5:00 → Speaking Practice (Daily life sentences)

### **15.11.2025 - Day 2:**

#### **Communication Skills**

- 10:00 – 10:15 → Warm-up Activity
- 10:15 – 11:00 → Asking & Answering Simple Questions
- 11:00 – 11:30 → Common Daily Conversations
- 11:30 – 11:45 → Break
- 11:45 – 12:30 → Role Play & Group Activities
- 12:30 – 1:00 → Feedback, Q&A & Certificate Distribution

#### **Conclusion of linguistic skill development**

- 2:00 – 2:15 → Feedback & discussion
- 2:15 – 3:00 → Exchange of ideas on English language learning
- 3:00 – 3:30 → Professional development for participants
- 3:30 – 4:00 → Networking among educators and learners

### **Report on Workshop on Basics of English**

A workshop on “Basics of English” was successfully conducted on 14<sup>th</sup> & 15<sup>th</sup> Nov 2025 at SKH Trusts Seva Nursing College. Workshop was organized by subject Incharge Ms. Aarti Bagul with the objective of improving basics of english language skills among first GNM & First Semester BSc Nursing students. Workshop began with a welcome address by Dr. Avinash Shirsath, who highlighted the importance of English in academic and professional life. The resource person, Dr. Avinash Shirsath, introduced the participants to the fundamentals of the English language in a simple and interactive manner. Sessions covered essential topics such as English alphabet and pronunciation, basic vocabulary, parts of speech, sentence formation, and simple daily conversations. Special emphasis was given to improving speaking skills and confidence. The trainer used engaging methods like interactive discussions, role plays, group activities, and practical exercises, which helped participants, understand the concepts easily. Students actively took part in all activities and showed great enthusiasm throughout the workshop. Doubts were clarified during question-and-answer sessions, making the learning process effective and enjoyable. Workshop concluded with a feedback session, where participants expressed their satisfaction and appreciation for the well-structured content and practical approach. Certificates were distributed to the participants, and the program ended with a vote of thanks. Overall, the workshop was highly beneficial and achieved its objective of strengthening the basic English language skills of the participants

# SAKHAR KAMGAR HSOPITAL TRUSTS SEVA NURSING COLLEGE

**Date:** 09 December 2025

**Time:** 10:30 AM

**Venue:** Multi-Purpose Hall (MPH)

**Group:** BSC Nursing students

**Programme In-Charge:** Miss Shweta Waghmare & Miss Komal More

## 1. Introduction

Menstrual health and hygiene is an essential component of women's physical, mental, and social well-being. Awareness regarding menstruation, hygienic practices, and the use of safe menstrual products plays a crucial role in preventing infections and promoting dignity among women and girls. With this objective, SKH Trust's Seva Nursing School and College organized a Menstrual Health and Hygiene Awareness Programme on 09 December 2025 at 10:30 AM in the Multi-Purpose Hall (MPH). The programme was organized for all female students of the school and college. The main guests of the programme were the esteemed members of Unicharm, who guided the students on menstrual hygiene practices and distributed sanitary pads to all female students.

## 2. Objectives of the Programme

To create awareness about menstrual health and hygiene

To educate students on safe and hygienic menstrual practices

To break myths, misconceptions, and taboos related to menstruation

To promote confidence, dignity, and self-care among female students

To ensure access to hygienic menstrual products through free distribution of sanitary napkins

**3. Organizing Team:** The programme was successfully planned and conducted under the guidance of the programme in-charges Miss Shweta Waghmare Ma'am and Miss Komal More Ma'am. Their leadership, coordination, and continuous support ensured smooth execution of the event. Faculty members, non-teaching staff, and student volunteers actively contributed to the success of the programme.

## 4. Schedule of the Programme

10:00 – 10:05 AM: Introduction of the Programme

10:05 – 10:10 AM: Felicitation of Guests

10:10 – 10:20 AM: Theme Inauguration

10:20 – 10:30 AM: Speech by Guest on the theme *"Together for a Period-Friendly World"*

10:30 – 10:40 AM: Skit by ANM Students

10:40 – 10:50 AM: Speech by Guest of the Programme on *Importance of Menstrual Hygiene*

10:50 – 10:55 AM: Speech by Chief of the Programme

11:00 AM – 02:00 PM: Vote of Thanks

11:00 AM – 02:00 PM: Distribution of Sanitary Napkins

## 5. Proceedings of the Programme

The programme began with a warm and informative introduction, emphasizing the importance of menstrual health education in today's society. The introduction highlighted the need to create awareness and promote a supportive environment for menstruating girls and women. This was followed by the felicitation of the guests, where the Unicharm members were honored for their valuable presence and contribution towards women's health awareness. Theme inauguration marked the official opening of the programme and focused on the theme *"Together for a Period-Friendly World"*. The theme highlighted collective responsibility in promoting menstrual health, hygiene, and dignity.

**6. Speech by Guest of Honour:** Guest of Honour from Unicharm delivered an inspiring speech on the theme *"Together for a Period-Friendly World"*. The speaker emphasized the importance of open discussions on menstruation, availability of hygienic products, and community support in eliminating stigma. The session motivated students to become ambassadors of menstrual health awareness.

**7. Importance of Menstrual Hygiene:** Guest speaker from Unicharm delivered a detailed talk on the Importance of Menstrual Hygiene. The session included information on:

- Proper use of sanitary napkins
- Frequency of changing pads
- Personal hygiene during menstruation
- Safe disposal of sanitary waste

Prevention of infections and health complications

**9. Address by Chief of the Programme:** Chief of the Programme addressed the gathering and appreciated the efforts of the organizing team, guests, and students. The speech emphasized the importance of regular awareness programmes and encouraged students to apply this knowledge in their daily lives and community health practices.

  
Principal

**10. Distribution of Sanitary Napkins:** From 11:00 AM to 02:00 PM, sanitary napkins were distributed to all female students by the Unicharm team. This initiative ensured access to hygienic menstrual products and reinforced the importance of proper menstrual care.

**11. Vote of Thanks:** Programme concluded with a **Vote of Thanks**, expressing sincere gratitude to the management of SKH Trust, Unicharm members, programme in-charges Miss Shweta Waghmare Ma'am and Miss Komal More Ma'am, faculty members, student volunteers, and all participants for their cooperation and support.

**12. Conclusion:** The Menstrual Health and Hygiene Awareness Programme organized by SKH Trust's Seva Nursing School and College on **09 December 2025** was highly successful and impactful. The guidance provided by Unicharm members, along with the distribution of sanitary napkins, significantly contributed to enhancing awareness, confidence, and healthy practices among female students. The programme played a vital role in promoting a period-friendly and supportive environment within the institution. The institution looks forward to organizing similar awareness programmes in the future for the holistic development and well-being of students.

## GREEN CAMPUS REPORT OF SEVA NURSING COLLEGE

### Introduction

Seva Nursing College is committed to creating and maintaining a green, clean, and sustainable campus. The Green Campus initiative aims to promote environmental awareness, conservation of natural resources, and eco-friendly practices among students, faculty, and staff.

### Objectives of Green Campus

- To maintain a pollution-free and eco-friendly campus
- To promote environmental responsibility among students
- To conserve energy, water, and natural resources
- To encourage sustainable and green practices

### Greenery & Tree Plantation in the campus of Seva Nursing College

- Regular tree plantation drives conducted within the campus
- Well-maintained gardens and lawns enhancing campus aesthetics
- Student participation in plantation and maintenance activities

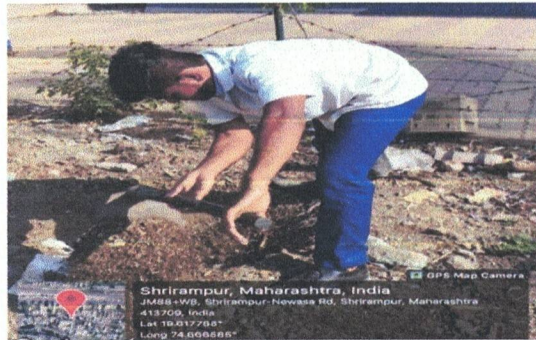

**Date: 21 march 2025: celebration of world tree plantation day**

*Bhosale*  
Principal

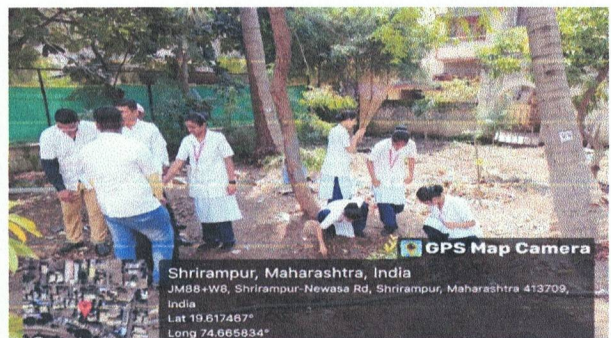

5 June 2025: World environment day

#### 4. Waste Management Practices

- Segregation of waste into biodegradable and non-biodegradable
- Use of dustbins at strategic locations
- Composting of biodegradable waste (where applicable)
- Awareness programs on waste reduction and recycling

Date:2.10.2025

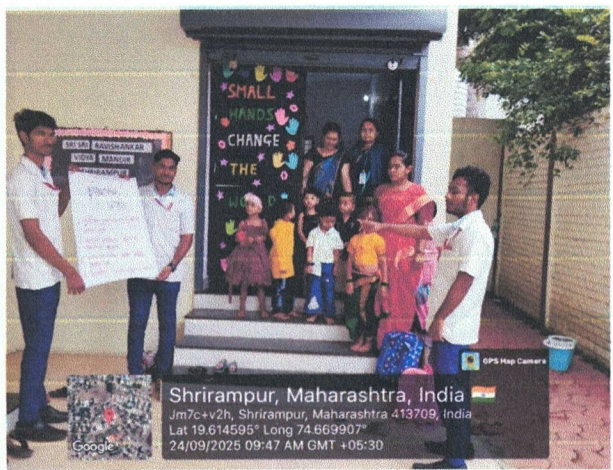

*Bhosale*  
Principal

## 5. Plastic-Free Campus Initiatives

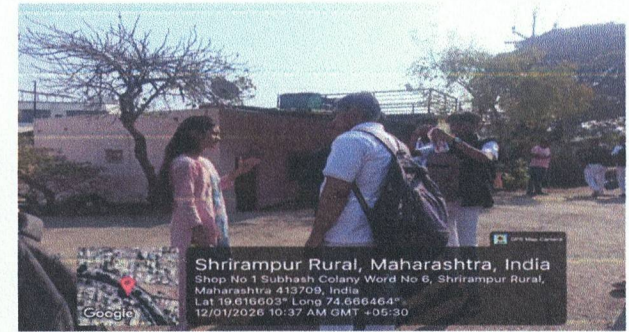

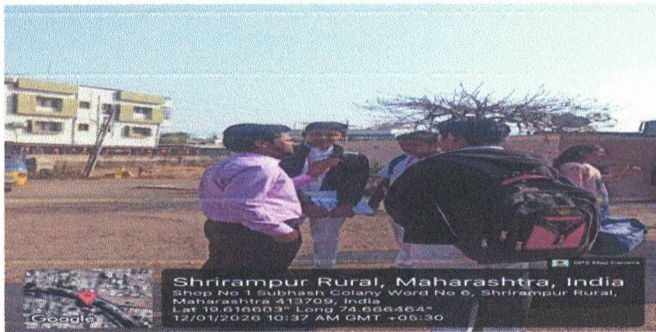

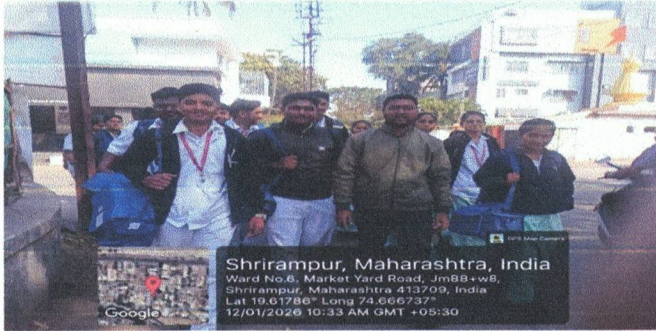

- Discouragement of single-use plastics
- Promotion of reusable bags, bottles, and containers
- Awareness campaigns on plastic pollution

**3 July 2025: World plastic prevention day: Health awareness programme on "Forbid the use of plastics"**

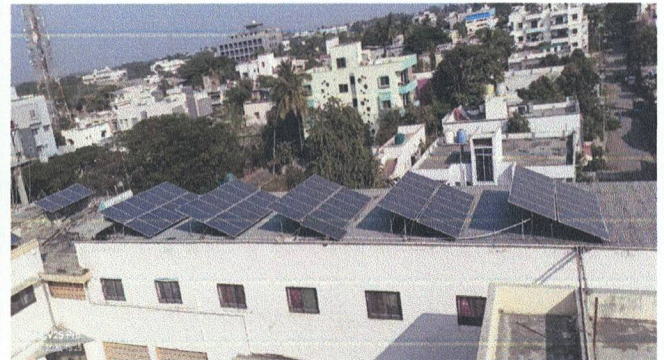

**Date: 12.1.2026: Community awareness on cleanliness drive**

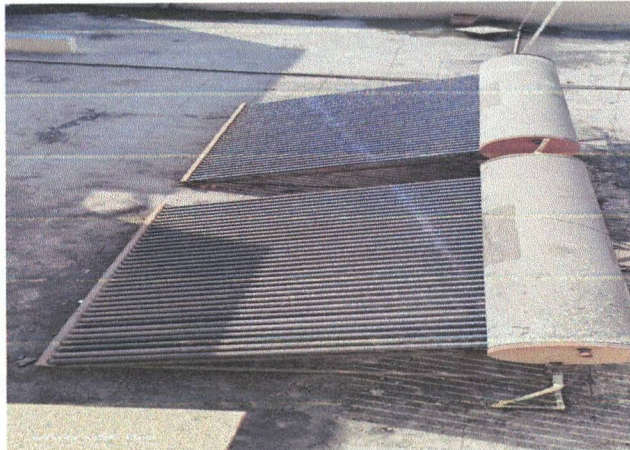

## 6. Energy Conservation Measures

- Use of LED lights and energy-efficient electrical appliances
- Maximum utilization of natural light and ventilation
- Awareness programs on energy conservation

*Bhosale*  
Principal

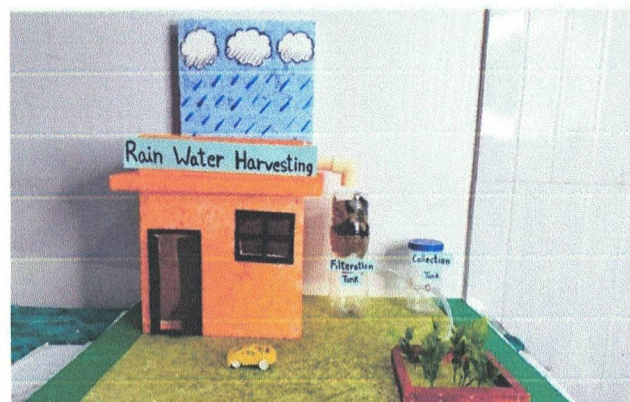

**Date: 1.1.2026: Solar plants in seva nursing college**

## **7. Water Conservation practices**

- Rainwater harvesting system (if available)
- Careful use of water on campus
- Regular maintenance of water pipelines to prevent leakage
- Awareness sessions on water conservation

**Date:1.8.2025: Rain water harvest models made by students**

Date: 1.1.2026: Reverse osmosis system

### 8. Cleanliness & Sanitation

- Regular campus cleaning and sanitation
- Cleanliness drives conducted periodically

30 March 2025 celebrated as International Day of Zero Waste

## 9. Environmental Awareness Activities

- Celebration of World Environment Day, Van Mahotsav, and other environmental days
- Poster presentations, slogans, and awareness talks
- Community outreach programs on environmental health
- Integration of environmental education in nursing curriculum.

*Bhosale*  
Principal  
Seva Nursing College  
Bajbar Kamgar Hospital Trust's

#### 10. Student & Faculty Participation

- Active involvement of students, faculty, and non-teaching staff
- Formation of eco-club / green committee (if applicable)
- Voluntary participation in green initiatives

Mr. Shivam Gholap M.Sc. lecture Nursing Seva Nursing College Shrirampur, Ahilyanagar

## ABSTRACT

**Background of the study:** Hypertension is a leading, modifiable risk factor for cardiovascular disease, stroke, chronic kidney disease and premature death worldwide. Despite the availability of effective pharmacologic treatments, suboptimal blood-pressure control remains common — partly because hypertension is influenced heavily by lifestyle factors (diet, physical activity, alcohol intake, tobacco use, and body weight). Lifestyle modification therefore forms a cornerstone of both primary prevention and long-term management of hypertension. **Objectives:** 1) To assess the existing knowledge and lifestyle status regarding hypertension among hypertensive patients. 2) To evaluate effectiveness of interventional strategies on knowledge and lifestyle status among hypertensive patients. 3) To find out the relationship between knowledge and life style status regarding hypertension among hypertensive patients. 4) To determine association between post-test level of knowledge and lifestyle status among hypertensive patient with selected demographic variables. **Methods:** -The study was quasi- experimental one group pretest and posttest. Quantitative-evaluative approach was adopted for study. Sample size was 60 that consisted hypertensive patients from the selected hospital. Systemic random sampling technique was used for the current study. **Results:** The experimental group showed significant improvements findings regarding effectiveness of the interventional strategies on the lifestyle status reveals that mean of posttest lifestyle status score of the study participants  $58.2 \pm 5.74$  is greater than that of mean of pretest lifestyle status scores of the study participants, i.e.  $39.91 \pm 6$ . and tabulated 't' value was 1.67 at 0.05 level of significance and degree of freedom 59 and calculated 't' value 22.03, was greater than the tabulated 't' value at a level of significance 0.05. Therefore, it proves statistically that the interventional strategies were effective in modifying lifestyle status regarding hypertension among study participants, study findings regarding relationship between two research variables shown that the co-relation score was  $r=0.34$  which indicated moderate positive correlation moderate positive correlation.

**Conclusion:** The interventional strategies were found to be effective in increasing and enhancing patient's knowledge and lifestyle status regarding hypertension. It can be implemented in various hospital and community settings for enhancing knowledge and modifying lifestyle of the patients with hypertension, and other high-risk individuals

**Keywords:** Evaluate, Effectiveness, Interventional Strategies, Life style Modification, Knowledge, Hypertensive Patients.

## **Abstract**

### **Introduction**

The incidence and prevalence of cancer in world, is Global cancer rates could increased by 50% to 15 million by 2002 the predicted sharp increased in new cases from 100 million new cases globally in 2000 to 15 million in 2020 will mainly be due to steadily ageing population in both developed & developing countries and also be current trends in smoking prevalence and the growing adoption of un healthy lifestyle. (WHO 2005).

In INDIA, "Cancer Train" offers uncertain route out of despair in India.

In India the "Cancer Express" is a train on which cheap cancer treatment is offered on the more It's a 10 hour ride from a distant in Punjab with a high prevalence discuses blamed on excessive use of pesticides to a charity cancer hospital in neighboring Rajasthan The government population control body found 103 people with cancer in a sample of 100;000 in one area of Bhatinda comp aired to 71 in an area near by with lower pesticide contamination

Music therapy, "A systematic process of intervention where in the therapist helps the client to promote health wing music experiences & the relationships that develop through them as dynamic force of change" The purpose of therapy always to help the client relax, cheer up or feel better in some immediate sense helps in inner healing process. In short it help in a physiological, psychological & immunological benefits.

There are many studies conducted Baily 1983 & Boldt 1996 both of which have been shown to increase specifically through music listening. People with cancer who engaged in music also have benefited in the form of greater physical relaxation & in form of decreased nausea & vomiting associated with chemotherapy.

The another study in which music appears to be particularly in the treatment of cancer related pain (Bailey 1983 Beck 1991, cook 1986) & through playing various musical instruments.

### **Methods:**

200 Patients with chronic and advance cancer illness were prospectively evaluated. The effect of music therapy on these patients are reported. Visual analog scale and behavior scale recorded pre and post music therapy scores on standardized data collection forms.

# “To Assess the Level of Anxiety & Depression among the Post Burn Client Admitted In Pravara Rural Hospital, Loni Bk”

Mr. Shivam Sunil Gholap SSEVP College of Nursing, Pravara Institute of Medical Sciences  
Loni B K.

Miss. Puja Anil Dighe SSEVP College of Nursing, Pravara Institute of Medical Sciences Loni B K.

Mr. Ajit B. Kadu SSEVP College of Nursing, Pravara Institute of Medical Sciences Loni B K.

## Abstract:

**Background of study:** The estimated annual burn incidence in India is approximately 6-7 million per year. The high incidence is attributed to illiteracy, poverty and low-level safety consciousness in the population. The goal of National programme for prevention of burn injuries (NPPBI) would be to ensure prevention and capacity building of infrastructure and manpower at all levels of health care delivery system in order to reduce incidence, provide timely and adequate treatment to burn patients to reduce mortality, complications and provide effective rehabilitation to the survivors. This study was conducted mainly focusing on psychological issues of burn patients. **Objectives of the study** 1. To assess the level of anxiety & depression among the post burn client. 2. To find out co-relation between anxiety & depression. 3. To compare and co-relate the anxiety & depression with selected demographic and clinical variable. **Materials and methods:** Descriptive research design was used. The purpose of the study was to assess the level of anxiety and depression among the post burn client admitted in, PRH Loni Bk. The collected data was analyzed by using descriptive and inferential statistics. **Result:** Aspect wise anxiety score of burn client mean is 11(59.99%) with the standard  $\pm 1.91$ . Aspect wise depression score of burn client mean is 9.72 (83.33%) with standard deviation  $\pm 1.92$ . To find out co-relation between anxiety and depression Karl Pearson coefficient of co-relation technique was used. The correlation score (R) was 0.167 it shows that there is mild positive co-relation between anxiety and depression.

**Conclusion:** Finding of present study shows that maximum number of burn clients having moderate anxiety and depression and the correlation score (R) was 0.167 it shows that there is mild positive co-relation between anxiety and depression.

**Keywords:** psychological problems, Assessment, compare, co-relate.

## I. INTRODUCTION

A burn is a type of injury to skin, or other tissues, caused by heat, cold, electricity, chemicals, friction, or radiation. Most burns are due to heat from hot liquids, solids, or fire. While rates are similar for males and females the underlying causes often differ. Among women in some areas, risk is related to use of open cooking fires or unsafe cook stoves. Among men, risk is related to the work environments.

# **Study to Assess the Knowledge of Mothers and Guardians Regarding Early Signs of Girl Child Abuse in Selected Area of Selected City**

**Ms. Gayatri Ramakant Gawade<sup>1</sup>, Mr. Ajmoddin Riyajoddin Shaikh<sup>2</sup>**

<sup>1</sup>Assistant Professor, Pediatric Nursing, SKH Trusts SCON, Shrirampur

<sup>2</sup>Professor, Psychiatric Nursing, SKH Trusts SCON, Shrirampur

## **Introduction**

In ancient times, general opinion accepted that children could be beaten and abused. The industrial exploitation of children after the middle ages was common place; with no widespread protest. Children are the most important age group in all societies. Health status and health behavior later life are laid down at this stage. Child health care should include specific biological and psychological needs that must be met to ensure the survival and healthy development of the child, the future adult. Early signs of girl child abuse have a lengthy history. In 16<sup>th</sup> and 17<sup>th</sup> centuries, American colonists carried the tradition of children being property of mothers in United States. Therefore, children have been subjected to abuse by their mothers since presumably the beginning of time.

Word abuse is derived from French word 'abuse' means "improper practice" and Latin word 'abuses' which means "a using up". Early signs of girl child abuse are defined as any act of omission or commission that end anger or impairs a child's physical or emotional health and development. Abuse refers to an act of commission by a parent of care taken resulting in harm to the child, and neglect refers to an act of omission by a parent or caretaker that produces harm. Early signs of girl child abuse is also known as battered child syndrome. The term battered child syndrome was coined by C. Henry Kempe in his landmark paper published in 1962 by the Journal of the American Medical Association. It refers to "a clinical condition in young children who have received serious physical abuse, generally from a parent or foster parent."

**Research Statement:** A study to assess the knowledge of mothers and guardians regarding early signs of girl child abuse in selected area of selected city.

## **Research Objectives:**

1. to assess the level of knowledge of mothers and guardians regarding meaning of early signs of girl child abuse .
2. to assess the knowledge of mothers and guardians regarding different types of early signs of girl child abuse .
3. to assess the knowledge of mothers and guardians regarding causes of early signs of girl child abuse .

# “To Assess the Level of Anxiety & Depression among the Post Burn Client Admitted In Pravara Rural Hospital, Loni Bk”

## Abstract:

**Background of study:** The estimated annual burn incidence in India is approximately 6-7 million per year. The high incidence is attributed to illiteracy, poverty and low-level safety consciousness in the population. The goal of National programme for prevention of burn injuries (NPPBI) would be to ensure prevention and capacity building of infrastructure and manpower at all levels of health care delivery system in order to reduce incidence, provide timely and adequate treatment to burn patients to reduce mortality, complications and provide effective rehabilitation to the survivors. This study was conducted mainly focusing on psychological issues of burn patients. **Objectives of the study** 1. To assess the level of anxiety & depression among the post burn client. 2. To find out co-relation between anxiety & depression. 3. To compare and co-relate the anxiety & depression with selected demographic and clinical variable. **Materials and methods:** Descriptive research design was used. The purpose of the study was to assess the level of anxiety and depression among the post burn client admitted in, PRH Loni Bk. The collected data was analyzed by using descriptive and inferential statistics. **Result:** Aspect wise anxiety score of burn client mean is 11(59.99%) with the standard  $\pm 1.91$ . Aspect wise depression score of burn client mean is 9.72 (83.33%) with standard deviation  $\pm 1.92$ . To find out co-relation between anxiety and depression Karl Pearson coefficient of co-relation technique was used. The correlation score (R) was 0.167 it shows that there is mild positive co-relation between anxiety and depression.

**Conclusion:** Finding of present study shows that maximum number of burn clients having moderate anxiety and depression and the correlation score (R) was 0.167 it shows that there is mild positive co-relation between anxiety and depression.

**Keywords:** psychological problems, Assessment, compare, co-relate.

## I. INTRODUCTION

A burn is a type of injury to skin, or other tissues, caused by heat, cold, electricity, chemicals, friction, or radiation. Most burns are due to heat from hot liquids, solids, or fire. While rates are similar for males and females the underlying causes often differ. Among women in some areas, risk is related to use of open cooking fires or unsafe cook stoves. Among men, risk is related to the work environments.
